

Abstract

A pharmaceutical composition is disclosed which
5 comprises a solid dispersion of an HIV protease inhibitor
in a water soluble carrier, such as PEG, having enhanced
bioavailability and improved dissolution properties. The
solid dispersion may optionally be encapsulated in hard
gelatin capsules, compressed into a tablet, or may be
10 granulated with a pharmaceutically acceptable granulating
agent. Also disclosed are methods of making said solid
dispersion and methods of treating an HIV infection
employing said solid dispersion.
